Executive Summary
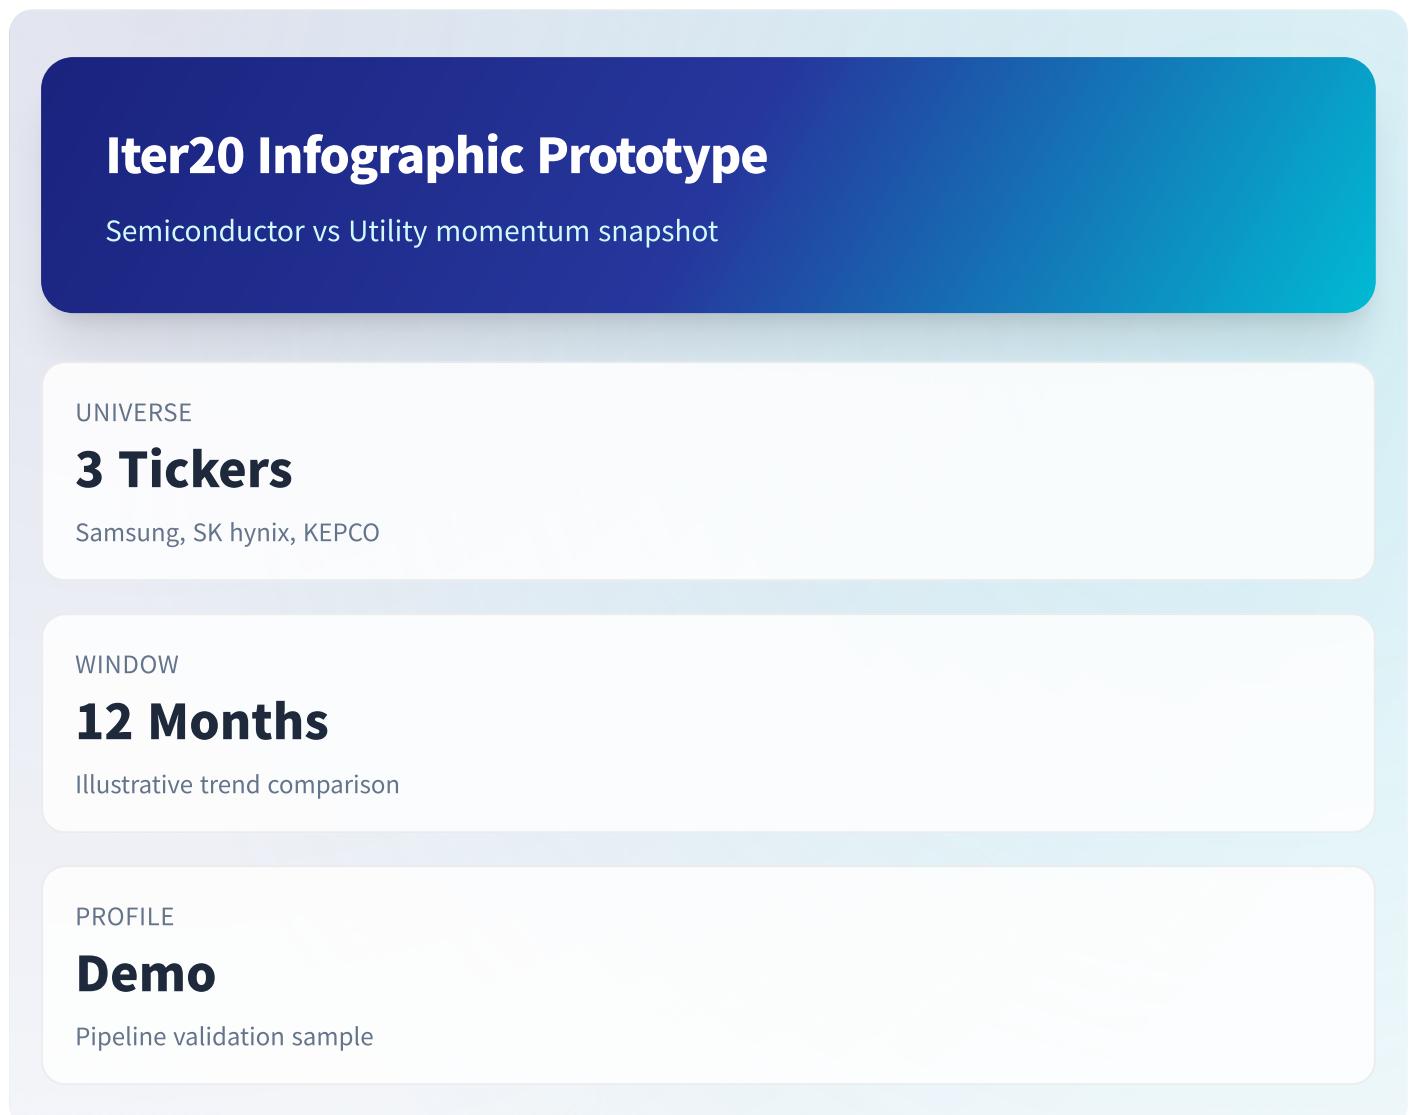

This iter-20 sample validates infographic generation path with explicit simulated labels and source traces [https://example.com/infographic-policy].

Scope & Methodology

Data points are illustrative to test chart rendering and report insertion behavior. Input chart spec is persisted in report_notes for reproducibility [./report_notes/infographic_spec_iter20_infographic.json].

Key Findings

The generated artwork demonstrates mixed chart engines (Chart.js + Plotly) and section-ready embed blocks.

Iter20 Infographic Prototype

Semiconductor vs Utility momentum snapshot

UNIVERSE

3 Tickers

Samsung, SK hynix, KEPCO

WINDOW

12 Months

PROFILE

Demo

Pipeline validation sample

Infographic: Iter20 Infographic Prototype (Simulated/Illustrative labels included where applicable).

Risks & Gaps

This sample does not validate claim-level factual consistency against external sources; it only validates pipeline mechanics.

Critics

Next iteration must connect extracted claim packets to chart specs automatically.
